

NTDM-5030A

X-ray penetrate to inspect object's metal structure, display where is invisible to the naked eye. can detect which is invisible to naked eyes. This machine is widely used in the detection of electronics, shoes, toys, courts, railway stations, as well as for the security detection of handbag.

FEATURES

Single Angle View
X-Ray Inspection Machine Single Energy
Pseudo-Color Scanning Image

TECHNICAL SPECIFICATIONS

Tunnel Size	507(W)×305(H)mm
Conveyor Speed	0.22m/s
Conveyor Max Load	170kg
Dose per Inspection	less than 1.5 μGy/h
Wire Resolution	38AWG
Resolution	<0.101mm
Penetration	30mm Steel Board
Film Safety	Guarantee ISO1600 Film
X ray Leakage	0.05 μGy/h
Monitor	17inch Dell brand
Detecting Method	X-Ray Boll- om-illuminated detecting
Generate direct	Upward
Anode voltage	80kv
Noise	<65dB 12
Generate angle	80 degree
Gross Weight	400KG (host) 50KG (work station)
Packing	Wooden
Packing Size	1800*855*1350mm(standard) work station: 850*750*1350mm(optional)
Dimensions	1.2m * 2.482m
